

Plataforma INECE

Current web site

Comments

1.- When entering the new INECE web site there is the lack of context info that allows to understand the web site corresponds to an worldwide organisation that promotes environmental enforcement.

When entering the web site it has to be identified simply and shortly the main function/goal of INECE. They way it is designed make it to look like any other web site of the cyberspace ...

INECE develops and supports regional and topical networks for enforcement and compliance cooperation to achieve better environmental results. Cooperation among government officials can help create a level playing field.

About INECE

The International Network for Environmental Compliance and Enforcement (INECE) is a partnership of government and non-government enforcement and compliance practitioners from more than 150 countries. INECE's goals are: raising awareness to compliance and enforcement; developing networks for enforcement cooperation; and strengthening capacity to implement and enforce environmental requirements. INECE is dedicated using regulatory and non-regulatory approaches to guide compliance with and enforcement of environmental laws and regulations that promote the sustainable use of natural resources and the protection of ecosystem integrity at the global, regional, and national levels. Comments

2.- Regarding its design, I believe it should have more colours (not just blue, black, grey and green) allowing to establish a relationship between different cultures, countries and regions interlinked through INECE web.

3.- As a very central axis of the web site it is needed to put an image of the current existing webs and the countries belonging to them, and the particular enforcement agencies too.

The screenshot shows the homepage of the International Network for Environmental Compliance and Enforcement (INECE). The website has a dark blue header with the INECE logo and navigation links. Below the header is a large banner image showing a person in a green safety vest with 'GJT' on the back, standing in front of a green truck. To the right of the image is a text overlay. Below the banner are three columns of content: 'About INECE', 'Upcoming Events', and 'Recent Library Additions'. The 'About INECE' section describes the network's goals and mission. The 'Upcoming Events' section lists the 'International Conference on Compliance and Enforcement of Environmental Law' in Wuhan, China, on September 9, 2016. The 'Recent Library Additions' section lists two items: 'Detection of Environmental Crime Training (DETECT) Manual' and 'Department of Energy: Whistleblower Protections Need Strengthening'.

Comments

4.- Grafically the proposal is sort of flat and it does not stresses the relevant contents. From a design point of view to have “color boxes” for each matter/content allows the user a better orientation.

- In order to highlight what is it INECE, it could be changed to visualization of the “about INECE” module and highlight it as a box throughout the web site.
- And then the rest of the content stays below, according to the discussed structure.

Comentarios

-For instance as a starting screen it would be a good idea to show a world map and the existing webs.

-And then within the map one can make a link to the different countries.

The screenshot displays the homepage of the International Network for Environmental Compliance and Enforcement (INECE). The header includes the SMA logo (Superintendencia del Medio Ambiente, Gobierno de Chile) and a search bar. Below the header, there are buttons for 'Sign up for INECE Updates' and 'Contribute Materials'. The main content area features a world map with various regions highlighted in different colors and labeled with regional groupings: IMPEL, Themis, CEC-EWC, CCAD, Red Sudamericana, NECEMA, AECEN, ANECE, and AELERT. Below the map, there are three columns of content: 'About INECE' (describing the network's goals and mission), 'Upcoming Events' (listing the International Conference on Compliance and Enforcement of Environmental Law in Wuhan, China, on September 9, 2016), and 'Recent Library Additions' (listing the Detection of Environmental Crime Training (DETECT) Manual and a Department of Energy Whistleblower Protections Need Strengthening report).

HISTORIA

La Red Sudamericana de Fiscalización de Cumplimiento Ambiental, se constituyó mediante la firma de la Declaración de Santiago, el 06 de noviembre de 2013, en la Sede de la Comisión Económica para América Latina y el Caribe (CEPAL), en Chile. En su oportunidad, el organismo estuvo integrado inicialmente por: La Superintendencia del Medio Ambiente de Chile; el Organismo de Evaluación y Fiscalización Ambiental de Perú; el Ministerio del Ambiente de Ecuador; y la Autoridad Nacional de Licencias Ambientales de Colombia.

Posterior a ello, mediante la firma de la Declaración de Lima, el 06 de noviembre de 2014, se incorporaron a la Red: La Secretaría del Medio Ambiente de Paraguay y el Instituto Brasileño del Medio Ambiente y de los Recursos Naturales Renovables de Brasil.

SUPERINTENDENCIA DEL MEDIO AMBIENTE – SMA (CHILE)

INICIO > MIEMBROS > SUPERINTENDENCIA DEL MEDIO AMBIENTE – SMA (CHILE)

La Superintendencia del Medio Ambiente (SMA) es un servicio público chileno, descentralizado, con personalidad jurídica y patrimonio propio, sometido a la supervigilancia del Presidente de la República a través del Ministerio del Medio Ambiente, y cuyos cargos directivos son provistos de acuerdo al sistema de Alta Dirección Pública. Se creó en virtud de la Ley N° 20.417 y entró en vigencia el 28 de diciembre de 2012.

A esta institución, le corresponde de forma exclusiva ejecutar, organizar y coordinar el seguimiento y fiscalización de las Resoluciones de Calificación Ambiental (RCA), de las medidas de los Planes de Prevención y/o de Descontaminación Ambiental, del contenido de las Normas de Calidad Ambiental y Normas de Emisión, y de los Planes de Manejo, cuando corresponda, y de todos aquellos otros instrumentos de carácter ambiental que establezca la ley, en Chile.

Comments

5.- Regarding to use on icons and letter font it is suggested to look for a format that could allow to highlight the info in a better way.

-The web site under assesment is too flat, making it boring and not visually attractive.

About

INECE develops and implements practical and innovative activities that strengthen environmental compliance and enforcement at all levels of governance – local, national, regional, and international. INECE builds the capacity of compliance and enforcement stakeholders to contribute to the rule of law and good governance in areas that advance sustainable development.

The Network includes environmental regulators, investigators, prosecutors, judges, and employees of international environmental and development organizations. Officials from customs, the police, non-governmental organizations, academia, the media, and business also participate.

Founded in 1989, INECE is the only global organization focused exclusively on achieving compliance with environmental law through effective compliance promotion and enforcement strategies, including administrative, civil, criminal, and judicial enforcement. INECE works on both national implementation of domestic environmental laws and on improving the effectiveness of multilateral environmental agreements.

INECE communicates that environmental compliance and enforcement play a fundamental role in building the foundation for the rule of law, good governance, and sustainable development.

INECE's Goals

INECE's goals are to:

- Improve enforcement and compliance through better cooperation.
- Strengthen capacity throughout the regulatory cycle to implement and secure compliance with environmental requirements.
- Raise awareness of the importance of environmental compliance and enforcement to sustainable development.

6.- Being a global network it should be allowed to visualize it in more than one lenguaje.

That is why it should exist the possibility to make an online (or pre recorded) translation of the page being visited.

Comments

7.- The Library could be divided into more categories. For example: Inspections, Enforcement and compliance, Environmental Justice, Next Generation Compliance, Authors Contributions, Seminars, videos, PPT, etc.

The screenshot shows the INECE Library website. The header includes the INECE logo and navigation links: About, News, Events, Library (highlighted), Topics, and Regions. A search bar is also present. The main content area lists several publications with their details:
